

ABSTRACT OF THE DISCLOSURE

**APPARATUS AND METHOD OF HIGHLIGHTING PARTS OF WEB DOCUMENTS
BASED ON INTENDED READERS**

5

10 An apparatus and method of highlighting a section of an
HTML document based on who accesses the document are
provided. When the document is accessed and displayed, a
plurality of button associated each with a different part of
the document is also displayed. When one of the buttons is
asserted, the section of the document with which it is
associated is highlighted.
